Summary

Frontend Engineer with 3+ years building high-performance, production-grade web applications in React.js and Next.js. Proven record of cutting LCP by ~42%, lifting Lighthouse scores from 68 to 94, and slashing redundant API calls by ~60% across B2B SaaS and procurement platforms. Specializes in scalable architecture, reusable component systems, real-time features, and AI-assisted workflows – shipping accessible, PWA-capable products at enterprise scale.

Skills

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React.js (Hooks, Redux, Context API), Next.js (App Router, SSR/SSG), React Native, Tailwind CSS, Radix UI, MUI, Bootstrap

State & Data: TanStack React Query, Zustand, Redux Toolkit, React Hook Form, Zod

Performance: Lazy loading, memoization (React.memo, useMemo, useCallback), debouncing, code-splitting, virtualization

Real-time & Auth: Socket.io-client, Auth0 (next-auth0 v4), role-based route guards, DOMPurify, JWT

Backend / DB: Node.js, Express.js, REST APIs, MySQL, MongoDB

AI & Tooling: AI prompt engineering, agentic LLM workflows, Git, CI/CD, Jira, Figma, Jest

Experience

Frontend Developer

Jan 2026 – Present

Web Spiders Pvt Ltd

Kolkata, India

- Architected **Trafasa** (B2B marketplace) in **Next.js 16 / React 18 / TypeScript** with App Router and SSR; built 7-step onboarding wizard (React Hook Form + Zod + Zustand) – cut **LCP by ~42%**, Lighthouse **68 to 94**, and form drop-off by ~35%.
- Optimized API layer with **TanStack React Query** (stale-while-revalidate, prefetching) and 300 ms debounced infinite scroll, slashing redundant network calls by ~60% and category-page TTFB to **under 200 ms**.
- Designed drag-and-drop storefront builder (**@dnd-kit**, virtualized rendering, React.memo/useCallback) enabling 50+ block reordering at **60 fps**; engineered **40+ component library** (Radix UI + Tailwind + CVA) driving ~70% UI reuse and ~30% faster feature delivery.
- Shipped real-time buyer–seller messaging via **Socket.io-client** (optimistic updates, DOMPurify XSS guard, Auth0 role-based guards) at **under 100 ms** latency; delivered a dark-mode, PWA-capable, fully responsive experience.
- Built end-to-end **Proquiro** RFQ module (Next.js 14) with multi-vendor quote comparison and quote-to-PO conversion – cut buyer evaluation time by ~45%; optimized Item Master over **50K+ SKUs**, reducing API calls by ~70% and search latency from ~1.2 s to **under 250 ms** (useMemo, useCallback, AbortController).
- Architected shared procurement state (RFQ, Indent, PR, Item Master) with **React Query + Context API** (normalized cache, hover prefetch) – cut redundant calls by ~55%, enabled sub-second navigation, and reduced perceived action latency by ~60% via optimistic updates and state-machine status pipeline.
- Engineered modular Indent wizard with React Hook Form + Zod, reducing code duplication by ~40% across 12+ shared components; improved Lighthouse from 68 to 94 and cut initial bundle by ~35% via dynamic imports.
- Improved Purchase Requisition approval UX with role-based action gating, optimistic updates, and state-machine pipeline – eliminated full-page reloads and reduced perceived action latency by ~60%.

Consultant – Frontend

Jul 2024 – Jan 2025

NTT Data Business Solutions

Pune, India

- Engineered SPAs using **React.js, Node.js, MySQL, Tailwind CSS**, achieving a **98.6% client satisfaction score**.
- Built RESTful services in **Node.js + MySQL**, enhancing data query efficiency by **25%**.
- Optimized UI responsiveness and ARIA accessibility, driving a **10% rise** in daily active users.

Frontend Developer

Jan 2022 – Apr 2024

Dual Lush Designs

Noida, India

- Delivered responsive web and mobile apps in **React.js, Next.js, React Native, Tailwind CSS**; implemented SEO-friendly SSR/SSG patterns, improving maintainability by **20%**.
- Built backend logic in **Node.js + Express.js + MySQL**, ensuring secure and efficient API delivery across multiple client projects.

Projects

- Trafasa** | *Next.js 16, React 18, TypeScript, TanStack Query, Zustand, Radix UI, Socket.io, Auth0, @dnd-kit* 2026
- B2B marketplace with seller, buyer, and storefront experiences; drag-and-drop builder for 50+ block reordering at 60 fps; LCP improved 42%, Lighthouse 68 to 94.
 - Real-time chat with <100 ms latency, 7-step Zod-validated wizard, dark-mode PWA-capable responsive UI.
- Proquiro** | *Next.js 16, TypeScript, React Query, Tailwind CSS, React Hook Form, Zod, AbortController* 2025-26
- End-to-end procurement platform (RFQ, Indent, Item Master, PR) – buyer evaluation time down 45%, API calls down 70%, search latency 1.2 s to under 250 ms over 50K+ SKUs.
 - Shared state layer, optimistic updates, role-based gating; Lighthouse 68 to 94, bundle reduced 35% via dynamic imports.
- Pure It Water** | *React.js, Next.js, React Native, Tailwind CSS, Express.js, MySQL* 2023-24
- Built and maintained SPA and mobile features with React Native + Next.js + Tailwind CSS, reducing load time by **30%** and improving mobile user engagement.
 - Engineered RESTful endpoints with **Express.js + MySQL**, accelerating data access by **25%**; implemented advanced caching strategies, cutting API response delays by **15%**.
- Wolseley UK** | *React.js, Next.js, MySQL, Node.js, Express.js* 2022-23
- Constructed e-commerce modules with **React.js + Next.js + MySQL** backend, boosting user engagement by **18%**.
 - Authored scalable APIs for order processing, payments, and customer management using **Node.js + Express.js**.
- ICBC Standard Bank** | *React.js, jQuery, HTML, CSS, Java, XSLT, XSLFO* 2024-25
- Automated invoice generation pipeline using **React.js, jQuery, XSLT, XSLFO, and Java**, reducing manual processing effort by **30%**.
 - Improved accessibility (ARIA standards) and system responsiveness, driving a **10% increase** in daily active users.

Education

Bachelor of Engineering 2015 – 2018
Dr. APJ Abdul Kalam Technical University
